### Here is WHY Toley Ranz is needed!

**“Mass shooters overwhelmingly fit a certain profile”**, say Jillian Peterson and James Densely, Hamline University, which means **it’s possible to ID** and treat them before they commit violence.

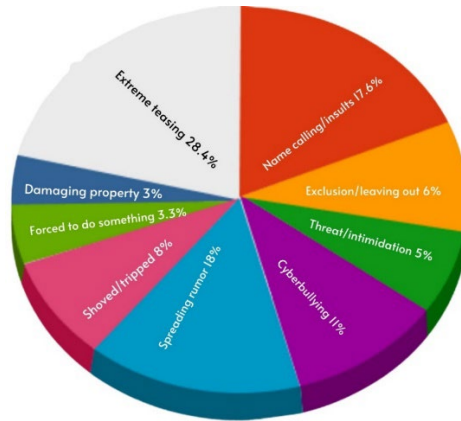

*“There’s this really consistent pathway. Early childhood trauma seems to be the foundation, whether violence in the home, sexual assault, parental suicides, extreme bullying. Then you see the build toward hopelessness, despair, isolation, self-loathing, oftentimes rejection from peers. That turns into a really identifiable crisis point where they’re acting differently. Sometimes they have previous suicide attempts.”*
